- Creating Events
- Working with Excel
- Scoring and Grading
- Awarding and Optimization
- Contracts and Sourcing Requests
- Creating Auctions

SAP added the direct sourcing function wherein the PLM/ERP system can be integrated with Ariba sourcing to receive the requirements from exploded BOM. All such requirements will then be sourced by using Ariba sourcing and rest of the procurement process will be followed in Ariba or SAP back end.

ERP planning systems getting integrated to ASN to get the commit from Supplier over planning forecast to confirm future receipt else on uncommitted demand, planner can take advance action to avoid supply disruptions.
