

Bundle Multi – (2 in 1)

SAP CLOUD PLATFORM INTEGRATION

Bundle Multi – SAP CPI – Course Syllabus

SAP Cloud Platform Integration Course Syllabus

1. Introduction to SAP Cloud Platform Integration

- Explore the SAP Cloud strategy
- Explain the positioning of SAP Cloud Platform Integration in the SAP
- Cloud strategy
- Explain the positioning within the Application Integration and Infrastructure
- Perform a classification according to ISA-M
- Explore use cases

2. Product Overview

- Explain the integration Platform-As-A-Service
- Explain the architecture
- Get an overview about integration capabilities
- Explain connectivity and converter options
- Use development tools

3. Basic Building Blocks of an Integration Scenario

- Explain the main phases of an integration project
- Explore the elements of an integration flow
- Use SAP Cloud Platform Integration, integration patterns

4. Twitter Basic Scenario, Foundation

- Explore the complete sample process
- Configure inbound communication
- Configure outbound communication
- Use events
- Use persistence

5. Twitter Basic Scenario, Advanced

- Use calls in an advanced integration scenario
- Explain the camel message model
- Manipulate the message with message transformers
- Explain message converters
- Use mappings
- Use XST mappings

6. Twitter Scenario, Extended

- Define message routers
- Explain scripting in message processing
- Define additional components
- Specify the runtime configuration

7. Concepts of Secure Communication

- Explain secure communication
- Explore concepts of secure communication
- Explain security elements related to the mail adapter
- Explain the relation of security artifacts to integration flow configuration

8. Other Security Aspects

- Explain the technical landscape
- Explain data storage security
- Perform user management for cloud integration
- Add members to an account

9. Operations and Monitoring

- Explain the operating model
- Explain web-based monitoring
- Explain APIs for monitoring

10. Additional Topics

- Perform the complete never bounce process
- Explain content transport
- Explain B2B support
- Design cloud integration content for SAP Process Orchestration 7.5 SP10
